

Partnering to *create* dream homes
 Montana Parade of Homes

2009 Vann's Parade Guidelines

Vann's is proud to partner with the Building Industry Associations Parade of Home events. As a means of supporting the many local builders who take part in this new home showcase, Vann's is offering the following programs for Parade Home entries.

Limited availability

Partnership program requirements and benefits*

- Purchase of a kitchen, home theater, and distributed A/V package is required.
- The client receives substantial discounts from Vann's standard retail price.
- The client can pick product from a list of Vann's preferred vendors and products.
- Installation of all components will be provided at a 20% discount.
- Homes will be staffed and equipment will be demonstrated by at least one Vann's representative during the entire Parade of Homes weekend.
- Additional marketing support, including inclusion on Vann's website, and a feature in Vann's marketing will be available at no charge to the builder or customer.

Unlimited availability

Standard program requirements and benefits*

- Purchase of a kitchen, home theater or distributed audio/video package is required.
- The client receives discounted pricing on products used in the parade home.
- The client can pick all of the individual components for the project.
- Dependent on availability, a Vann's representative may be available to work in these homes periodically during the Parade of Homes weekend.

Please contact a Vann's Living Style representative at 866-241-5657 for more information.

Kitchen appliance package

A kitchen appliance package includes a free-standing/built-in refrigerator, dishwasher, range/cooktop/wall oven, and ventilation (hood or over-the-range microwave). Additional components for these kitchens packages may include disposals, wine storage, warming drawers, coffee systems, compactors, laundry products, and appliances for other areas of the home.

Home theater package

A full home theater package includes an A/V receiver with Dolby Digital/DTS surround sound, at least five speakers (in-wall, in-ceiling, or freestanding), a subwoofer in the theater area, a Blu-ray player, high definition satellite or cable system, and a high definition video display (flat panel HDTV or front projection system).

Distributed A/V package

A distributed audio/video solution includes a system capable of providing sound and video to at least three different areas of the home from a central system. Each of the three areas needs to have speakers, volume controls, and at least one digital keypad. (Two keypads are required for partnership program level). Outdoor — deck, garage, or yard — areas will qualify as part of these systems, as will additional options such as cameras and intercom systems.

*Discounts offered must adhere to vendor program rules. Loaner product is not available. Client must take delivery of all product a minimum of 3 weeks prior to the Parade event. **Laundry purchase is also required for the partnership program level if it is displayed in the home. Vann's reserves the right to maintain photos and/or video of these homes for use in future marketing campaigns, and will need access to the home prior to the Parade of Homes for photography purposes.
